

## ***Algebranary!***

You know the rules of Pictionary. Get a word, draw a picture, get the next person to guess. In this game you will be given an equation, and you draw the model of that equation for your partner (scales or area). Your partner will write the equation in "math" and proceed to solve the equation. When they have shown their work they bring this page to the teacher and receive the next equation. There will be ten rounds.

Round	Equation (where you solve)	Model (where you draw)
